Practically Featured
Ease of Operation
Rapid, Rugged, Reliable

Omnimark introduces the only touch screen moisture analyzer in the marketplace

- **Statistical evaluation** of any series of tests can be performed by simply selecting the data from memory and requesting the calculations including mean and standard deviation.
- **Fifty individual programs** can be stored in memory. From powders to liquids the *Select* model will provide accurate results, typically in as little as three to 10 minutes.
- *Select* model moisture analyzer from Omnimark can be coupled with an external printer or computer to provide **time and date stamped** hard copy of a wide variety of test information in user definable format with customer text editing.
- Additionally, the *Select* can be run at remote sites, powered from a vehicle battery when coupled with the optional inverter offered by Omnimark.

Specifications: *Select* Model

Method of Measurement:	Loss on Drying
Heat Source:	Halogen or infrared heater
Temperature Setting:	30° to 230°C in 1 degree increments
Standby Temperature:	Programmable from ambient to 100C
Heating Modes:	Three programmable intervals with selection of ramp and rate
Balance Capacity:	124 Grams
Display of Results:	0.01% / 0.001g
Drying Program Storage:	Fifty, custom with alphanumeric naming
Units of Measurement:	Weight, Percent Moisture, Solids, Dry Weight
Endpoint Determination:	Programmable by percent of weight over time or fixed time
Security Lock:	Multiple options for authorized programmers and Anti-theft
Power Requirements:	115V or 230V
Weight and Dimensions:	14lbs (6.5kg), 8.5"x 13.25"x 7" (21.6 x 33.7 x 17.8 cm)
Warranty Period:	Two years, parts and labor
Options:	Printer, Inverter, Carrying case, Validation Kit, In-use cover

In-House Testing:

Omnimark will test your material and provide the data compared to the standard reference method at no charge for the life of your unit.

Free Demonstration:

No charge evaluation units available.
